

Science Bench V2 procedural benchmark architecture

A multi-layer scientific discovery benchmark with hidden simulators, executable laws and cross-layer gates

a Science Bench V2: hidden procedural discovery pipeline

b Domains and relation types

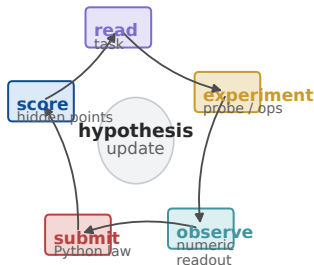

Experiment forms: physics probe; chemistry titration; biology

Layer chains: IURC, IUC, IURCC

first prediction law
extrapolate keeping prior fit tighter
when family of parameters
anomaly falsifies old law

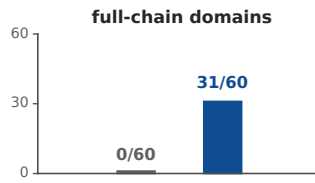

c Single-layer agent loop

physics: ≤ 40 rounds, ≥ 6 probes

chem/bio: ≤ 48 rounds, ≥ 8 valid experiments

d Scoring and seed-0 summary

chat reasoner

reasoner: 13/20 physics; 18/40 chemistry/biology

oracle smoke: 4/4 layers passed
